PT-**RQ35K** Series
3-Chip DLP™ Projectors

World's Smallest and Lightest 30,000 lm 3-Chip DLP™ 4K Projector* Streamlines Workflow Management

* Based on publicly available dimensions and weight for 3-Chip DLP™ 4K laser projectors with 26,000–35,000 lm brightness as of December 2020. PT-RQ35K Series has 30,500 lm (measurement, measuring conditions, and method of notation all compliant with ISO/IEC 21118: 2020 international standards, average value of all products when shipped).

■ Main Features

01 | ## Revolutionize Projection with Streamlined Workflow

Despite its high brightness and jaw-dropping image quality, PT-RQ35K is the lightest 3-Chip DLP™ 4K projector in its class and can be carried by two people, saving resources.

02 | ## Spellbinding Picture Quality

Two blue and one red laser expand color-space by 114 %[1]. Vivid reds and deep, natural blues heighten realism and help create an immersive projection experience faithful to the artist's intent.

03 | ## Original Cooling System for Projection Stability

Cooling system and finless radiator reinforce reliability over 20,000 hours[2] of maintenance-free operation. Backup input and laser failover circuitry maintain image display in mission-critical situations.

*1 In comparison to the PT-RQ32K according to internal research. *2 Around this time, light output will have decreased by approximately 50 %. IEC62087: 2008 Broadcast Contents, Normal Mode, Dynamic Contrast [3], temperature 35 °C (95 °F), elevation 700 m (2,297 ft) with 0.15 mg/m³ of airborne particulate matter. Estimated time until light output decreases to 50 % will vary depending on environment. *3 Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards. Value is average of all products when shipped. *4 Average light-output value of all shipped products measured at center of screen in Normal Mode. *5 Maximum physical resolution with Quad Pixel Drive ON.

Streamlined Installation Workflow

With a body 40 %*1 smaller than the PT-RQ32K and footprint approximate to the PT-RQ22K, PT-RQ35K Series is easily carried by two people. Setup on AC 100–120 V*2 minimizes delays while AC 200–240 V is rolled out. Preactivated upgrade kits for Geo Pro*3 expedite multi-screen calibration. You can check content on PC screen prior to projection via Remote Preview even while the projector is in Standby.

Spectacular Color for Multi-Screen Projection

Red and blue lasers achieve vivid reds and deep, natural blues with color-gamut reproduction expanded to 114 % (91 % DCI) over the PT-RQ32K. Newly developed Gradation Smoother reduces banding noise in gradients of shaded color. Improved edge-blending function allows you to adjust black border to screen curvature using up to 17 control points for precise black-level calibration.

Smart Projector Control with NFC Function*4

Get a head start on projector setup even without AC power: just pair your smartphone via NFC and enter Projector ID and IP address. Smart Projector Control app expedites network connection*5 with a QR Code displayed on Information Monitor, no SSID or password required. Adjust settings without menu projection and focus via smartphone camera*6.

Engineered for Absolute Reliability

Dynamic Digital Control precisely adjusts red-laser output to image requirements and temperature. Projection stability is maintained by a dedicated cooling system. Finless radiator boosts cooling efficiency while shielded laser drive preserves image quality over 20,000 hours*7 of maintenance-free projection. Backup input and failover circuitry maintain image display in mission-critical situations.
